

TechMart GREEN

DESIGNIATION FACT SHEET

By Product Flag

Green (4)

Recycled (4)

Did you know?

Many sustainable products are indicated on TechMart or through the ACT LABEL system!

Check out our website for our curated list of sustainable products or recycling programs!

What is the TechMart Green designation?

It indicates if a vendor has said this item meets their own standards for being a sustainable product. The Green designation flag may not always be a reliable indicator of sustainability since this designation is not verified independently. So, it is best to investigate the recyclability, energy- and water-use requirements, packaging, and consumable recyclability before purchasing. When searching on TechMart, be sure to select sustainable items by selecting the product flag on the right-hand menu of the search page.

What does the ACT LABEL mean?

It indicates third-party verified information about the environmental impact of laboratory products. Since this information is verified by a third party, you can trust the information and values provided for an item's environmental impact scale.
